

System Repair Cleat

An innovative solution for the retrofitting of damaged cleats on old cables that cannot be moved. These custom-made retrofitting cleats can be provided on a rapid turnaround. These can be supplied with adjustable elements to overcome onsite variables.

Please contact the Prysmian Technical team for assistance

Auxiliary Stand-Off

Used to secure an auxiliary cable along the same route as an existing cable installation. Secured by the multi-strap system, the stand-off arrangement is made from a tough LSOH polymer. Used with rubber liners.

Contact the Bicon technical team to discuss your specific requirements

Miscellaneous Arrangements

Multicleat/Multistrap System

The Multicleat / Multistrap system is ideally suited for securing groups of cables of differing sizes. The Prysmian technical help team will be able to match the correct cleat /strap to the size and fault rating of the cable arrangement.
