

## Deep earthing system components

FS11

### FS11

Steel tip with hardened top.

**Particulars:**

- special steel material
- accepts different types of earthing wires
- to be used with FS21 leading rod

Area	Cat. no.	Weight	Pcs/pack	Length
16-70 mm <sup>2</sup>	FS11	0.90 kg/pack	5	135 mm

FS12

### FS12

Steel tip with hardened top.

**Particulars:**

- special steel material
- accepts different types of earthing wires
- to be used with FS21 leading rod

Area	Cat. no.	Weight	Pcs/pack	Length
70-95 mm <sup>2</sup>	FS12	1.3 kg/pack	5	135 mm

FS21

### FS21

Leading rod, with a knurled recess for effective locking of the earth conductor. Used for normal and soft soils.

∅	Cat. no.	Weight	Pcs/pack	Length
17 mm	FS21	3.3 kg/pack	5	800 mm

FS31

### FS31

Extension rod with locating pin fitting into the preceding tube. For normal and soft soils.

**Particulars:**

- steel tube, diameter 17 mm
- to be used with FS21 leading rod

∅	Cat. no.	Weight	Pcs/pack	Length
17 mm	FS31	3.9 kg/pack	5	870 mm (incl guiding pin)

FSHD11

### FSHD11

Heavy duty special steel tip with hardened top, used for hard and stony soils.

**Particulars:**

- to be used with FSHD23 leading rod

Area	Cat. no.	Weight	Pcs/pack	Length
25-70 (95) mm <sup>2</sup>	FSHD11	1.3 kg/pack	5	153 mm
