

nVent CADDY Pyramid H-Frame

nVent CADDY Pyramid H-Frame Series Support System is a fast and economical solution for a variety of rooftop applications where support height and width exceed those of the nVent CADDY Pyramid ST or nVent CADDY Pyramid RL series. It provides an ideal support solution for duct, large diameter pipe or cable tray. Superior load distribution and a low abrasion foam interface combine to ensure that the roof membrane is protected despite varying roof surfaces and shifting caused by expansion and contraction.

- Foam or rubber bottom offers low abrasion interface for better roof membrane protection
- Compatible with roof surfaces including single ply, bituminous, metal and spray foam
- Provides superior load distribution, even with varying rooftop surfaces
- Rubber rooftop interface ideal for solar panel array installations
- Hot-dip galvanized and UV stabilized for long lasting performance
- Accepts standard strut channels

nVent CADDY Pyramid H-Frame Post Base

Individual post base with pre-installed strut nut provides the flexibility to create custom frame work by simply adding appropriate lengths of strut and hardware.

nVent CADDY Pyramid H-Frame Kit

Includes two post bases with pre-installed strut nuts and an additional hardware kit to construct an H-Frame by adding appropriate lengths of strut.

nVent CADDY Pyramid H-Frame Hardware Kit

Includes two L-brackets, six bolts and six strut nuts to construct a custom H-Frame by adding appropriate lengths of strut.

WARNING

nVent products shall be installed and used only as indicated in nVent's product instruction sheets and training materials. Instruction sheets are available at www.erico.com and from your nVent customer service representative. Improper installation, misuse, misapplication or other failure to completely follow nVent's instructions and warnings may cause product malfunction, property damage, serious bodily injury and death and/or void your warranty.
