

Easy Opener®

The WEICON cable dismantling tools allow all common round cables to be stripped quickly and safely. The product family of cable dismantling tools includes various types, which have proved to be easy to use and to produce accurate results.

The Easy Opener is a special tool for the gentle disassembly of sensitive components and for working on clipped housings. The Easy Opener is produced entirely in Germany and is made from fibreglas-reinforced polyamide. This material is flexible and stable at the same time, which makes the tool perfect for different applications, e.g. for loosening switches, luminaires or similar components.

With this tool, housing components can be opened without scratching sensitive materials. There are three lever surfaces with different material thicknesses available for this purpose.

Technical Data

Application range	material gentle opening without damaging adjacent surfaces
Lifting surface	three lever surfaces with different material thicknesses
Length	180 mm
Weight	22 g
