# PVX611-WOBC

The PVX611 is designed for highest mobility and accessibility within machines and transformers. TB and KB dies are available following the same tested and approved die geometry as the 1300-system BxxL-dies.

#### Properties:

- flexible and ergonomic design
- warning light and sound when pressure is not reached during the crimping process
- crimping force: 55kN (6 ton)
- crimps/charge: 150-250 depending on size and temperature
- crimp time: 3-5 s
- battery charging level indication

The offer includes tool and case without battery and charger.

*Get a discount on TB-dies for our KRF/KSF-range. Choose from our catalogue.*
