

CONVERTER TO EFLEX ROUND

Converting EFLEX Square to EFLEX Round allows EFLEX Square to be used with a wider range of Furukawa accessories and assists with connections to other types of pipes/ conduits, such as steel or PVC. This converter is required when using the AQUA Connector with EFLEX Square (see page 15).

- 1 Apply lubrication to the rubber seal on the male connector of EFLEX Square and the inside of the female connector on the Converter to EFLEX Round.
- 2 Ensure the connectors are free from dirt and debris and Insert the male connector of EFLEX Square into the female connector of the Converter to EFLEX Round:

- 3 Furukawa offers a wide range of adaptors. Please contact us for advice on which Furukawa adaptor to use when connecting EFLEX to other types of pipe/conduit.

NOTE

- Connection is permanent and cannot be disconnected.
- Do not apply lubrication to the locking ring.
