

THE COMPLETE PANDUIT CABLE CLEAT TOOLS

The manually-operated **BT2HTI** and **BT75SDT** tools are used to install Panduit's Buckle Strap Cleats.

The **BT2HTI** is a ratchet-style installation tool, allowing for high tension with minimal effort.

The **BT75SDT** tensions the strap using a screw drive mechanism, providing high tension while reducing operator fatigue.

Both tools use a lever to cut the strap so there is an appropriate length remaining to fold over and secure with the buckle tab. A side entry slot allows for easy strap insertion, streamlining installation. The BT2HTI is more suitable for higher volume installations, and the BT75SDT for lower volume.

For use with **Stainless Steel Buckle Strap Cleat**

For use with **Stainless Steel Locking Strap Cleat**

Part Number	Description	Length		Width		Used With	Std Pkg. Qty.
		In.	mm	In.	mm

THE COMPLETE PANDUIT CABLE CLEAT TOOLS

The battery-operated **PBTMT** and manually-operated, ratchet-style **RT2HT** tools are used to install Panduit's Locking Strap Cleats.

Both tools tension the strap through its locking head using a gripping tooth mechanism and then cut the end flush, eliminating any sharp edges.

A side entry slot allows for easy strap insertion, streamlining installation. The PBTMT is more suitable for higher volume installations, and the RT2HT for lower volume.

PBTMT/E

Part Number	Description	Length		Width		Used With	Std Pkg. Qty.
