

MJS01 Mechanical Jack Stand

With drums being delivered in a variety of diameters, MJ screw jacks often need to be raised in height. The mechanical jack stand, or jack plinth as it's commonly known, facilitates this safely whilst at the same time increasing the foot print for increased load stability

- Angular steel construction
- Accommodates our MJ range & most other screw jack manufacturers
- Lifts the jack by 300mm
- Jacks secured in position by locking pins
- Zinc plated finish
- Size: 1000mm x 320mm x 340mm high
- Weight: 19Kg each
