

SLR14P Heavy Duty 214mm Straight Line All Plastic Bridge Style Cable Roller

The SLR14P is a heavy duty all plastic cable roller for use in most cable laying applications. The design makes the roller light in weight whilst maintaining the strength of a conventional cable roller. There is also an added benefit of being able to link together to form a chain for those difficult situations or being used on its side as a bend roller. The unit is non-conductive, reduces the risk of damage to the cable and is neatly stackable thus reducing storage space by half

- Heavy duty all plastic straight line bridge roller
- 140mm diameter (114mm radius) nylon roller
- Sealed roller bearing with 20mm shaft
- Plastic moulded frame
- 214mm diameter cable capacity
- Size: 35cm long x 25cm wide x 20cm high
- Weight: 2.9Kg
