Highly visible and mechanical protection for all buried utilities.

Tapetile® is designed to offer a significant upgrade in the level of protection for buried utilities compared to traditional warning tapes. Offering peace of mind to asset owners and contractors, Tapetile® is a more robust and durable solution for protecting buried cables and pipes.

Tapetile® provides a durable safeguard for power cables, fibre optics cables and gas pipes with a proven record of reducing strikes.

When used in conjunction with Stokbord® Cable Cover, it enhances protection significantly making it suitable for protecting high voltage transmission lines below ground. Both Tapetile® and Stokbord® Cable Covers are specified by National Grid under TS.03.05.07.

Tapetile® is supplied as a roll, this offers easy installation as it can be unrolled directly into the trench above the buried utility. Unlike conventional warning tape, Tapetile® does not twist or turn during installation and remains securely placed once installed.

Tapetile® is made from 100% recycled polyethylene plastic, which is then laminated with brightly coloured film and customised text to offer a visual warning helping prevent accidents during excavation. The colour and text can be tailored to meet your specifications.

Offers a more robust solution than conventional warning tape

Does not tear when ground is being disturbed, making it far easier for excavators to see

Easy to install, fast and effective roll out in trench

Provides a clear visual warning of buried utilities to help prevent utility strikes

Specified and approved by utility companies in the UK and international markets

Product manufactured to meet ENATS (12-23) V4, National Grid TS.03.05.07 and EN50520 specifications

Can be made in bespoke sizes and with customised warning legend

Tapetile® is manufactured from post-consumer and post-industrial recycled plastic. This means that there can be some variability in product performance and with finish and colour uniformity. The degree of variability is controlled by our ISO 9001 Quality Assurance scheme. For more information, refer to the relevant Specification Data Sheet for this product.
