technical support

Creating clever,
uplifting solutions,
together with our
clients for almost
100 years.

Wibe Group specializes in cable management solutions for a wide variety of applications, ranging from commercial buildings to harsh corrosive industrial environments. We provide innovative and high-quality cable ladders, cable trays and mesh trays.

With our head office in Sweden and multiple in-house locations, where we combine expertise, production and distribution, we offer cable management solutions under our brands Wibe, Stago, Defem and Mita.

By the power of combining our brands, we are now able to offer a comprehensive offer in both FRP/GRP pultruded materials, as well as metal materials in surface treatments ranging from pre-galvanized Zinkpox to hot-dipped galvanized and stainless steel.

Mita Flex – our range of FRP/GRP cable management solutions for harsh corrosive environments

Mita Flex relates to our newest range of FRP/GRP pultruded cable management solutions, including cable ladders, cable trays, all related form pieces and accessories, as well as a new innovative and flexible support system, needed for a professional installation.

As the materials are produced in FRP/GRP, they are perfectly suited to be installed in harsh environments under harsh corrosive circumstances. Examples of such applications are:

- Oil and gas
- Wind energy
- Industry, e.g. petrochemical, water treatment
- Infrastructure, e.g. tunnels
- Datacenters
- Fish farms
- Marine

Mita

High performance leader in Glass Fibre Polymer (GRP) ladder and tray system. Top-tier corrosion resistance, anti-static and non-conductive solutions tailored for harsh environments and applications.

What is FRP/GRP?

FRP/GRP refers to Glass fibre Reinforced Polymer, meaning it is a man-made resin based material which makes it a polymer, reinforced with glass fibre.

The polymer itself is extremely strong, and in contrary to how it may sound, it is very durable. It is resistant to most chemicals, stretching and shrinking, resistant to mildew and abrasion as well. When it is reinforced with glass, it becomes a structural polymer. Further to

these, GRP does not conduct heat. It has extra durability to adverse weather conditions and is UV-resistant which makes it an excellent candidate for outdoor applications, even for wind substations built in the middle of the sea.

Long service life

- UV-resistant
- Corrosion resistance
- High chemical resistance
- Low maintenance

Fire resistance

- Low thermal propagation
- Halogen free
- Self-extinguishing material
- Lower toxic fumes

Insulation

- Excellent electrical insulator
- No earth needed
- Excellent cable protection
- Low thermal conductivity
- High dielectric strength

Materials

- Light, flexible and robust
- Light-weight & very strong
- None sparking
- UV resistance
- High mechanical resistance
- High temperature resistance
- Optimized design to reduce volume and handling

Mita Flex FRP/GRP is pultruded for optimal strength

Pultruded Composites consist of four or five main elements:

- 1) Glass roving's (strands) and mats -approx. 50% by weight
- 2) Resin - usually Polyester
- 3) Filler - usually Calcium Carbonate
- 4) UV Veil and UV additives
- 5) Fire Retardants as required

Pultruded composites remain largely impervious to corrosion regardless of application.

Resin types for any kind of application

Mita® Flex offers 4 main resin types to accommodate the requirements of various industrial applications which can be in chemically aggressive, demanding environments.

Polyester Class 1 (PC1)

Colour RAL7047

Polyester is the most widely used resin. It offers good weathering properties with resistance to ultraviolet light and offers resistance to corrosion. Our polyester resin has been specially formulated to meet certain fire and smoke standards and can be classified as a "class 1" resin in accordance with BS476 P7 and ASTM E84.

Vinylester (VE)

Colour RAL7047

Vinylester is formulated for maximum corrosion resistance to most fuels, vapors and chemicals, but is also heat resistant and blended for durability. It's a preferred resin in the marine industry due to its excellent corrosion resistance and ability to withstand water absorption.

Acrylic (AC)

Colour RAL7047

Acrylic is a formula that meets or exceeds the most stringent low flame, smoke and toxicity standards in the market today. Typical applications such as tunnels, mass transit, enclosed areas or needs where low flame, smoke and toxicity levels are critical.

Polyester with anti-static properties (AS)

Colour RAL9004

Polyester resin can be given anti-static properties to meet specific project requirements. Anti-static resins contain carbon powder, which increases the conductivity of the material and as a result this material requires grounding.

All FRP/GRP materials are standard available in Polyester Class 1 - article numbers with suffix PC1. To obtain article numbers for materials in other available resins, Polyester Antistatic (AS), Vinyl Ester (VE) and Acrylic (AC), simply replace the "PC1" suffix at the end of the article number with "AS", "VE" and "AC" respectively.

For example, cable ladder LM100 CL-150-3000

MLM1142PC1 for material in PC1
MLM1142AS for material in AS
MLM1142PVE for material in VE
MLM1142PAC for material in AC

Introducing Our MultiFlex Support System

A versatile system of interchangeable parts that provides complete flexibility during installation and enables genuine bespoke configurations. It is designed to support heavy cables and offers adjustment in every direction. The system allows for creating flexible fixation points wherever needed for heavy cables, ensuring complete installation adaptability.

GRP/FRP Support channels are designed to reduce weight while maintaining strength and maximizing loading capacity. The MultiFlex system offers ergonomic benefits while handling and installing ladders and support system equipment. The support channels are available in multiple polymeric materials, each carefully designed to fit specific project requirements. Our innovative support system comes with a wide range of smart and practical features which simplify and improve the installation process.

Cable Ladders overview

Mita Flex offers a complete range of composite cable ladders, including fittings and accessories, available in three series: LM100, LMP150 and LH150.

The FRP/GRP cable ladders are light, yet strong and corrosion resistant. They are designed to deliver high performance, maximum load capacity with reduced weight and improved handling, allowing easy and quick installation. The cable ladders are available in a variety of resin types.

Cable Ladder Type	Resin Selection	Rail Height (mm)	Working Depth	Rung Fixation	SWL 3m(kg/m)	Length (m)	Nema FG1 / UL568
LM100	PC1 – Polyester Class 1 AS – Polyester Antistatic VE – Vinyl ester AC – Acrylic	100	70	SS bolts	200	3 *	12C
LMP150	PC1 – Polyester Class 1 AS – Polyester Antistatic VE – Vinyl ester AC – Acrylic	150	120	SS bolts	250	3/6 *	16B
LH150	PC1 – Polyester Class 1 AS – Polyester Antistatic VE – Vinyl ester AC – Acrylic	150	120	SS bolts	350	3/6 *	20C

SWL according to IEC 61537, Test Type 3 with reduced end span 3/4 | For NEMA FG1 Load rating. Technical Department to be contacted.

* Alternative lengths available on request

Composite Cable Ladder range for supporting cables.

- Tested to IEC & NEMA Standards for SWL
- Ladder heights 100mm & 150mm
- Length 3000mm & 6000mm
- Material: FRP Polyester Class 1 (Other Resins are available)

Cable Ladder LM100

Cable ladder with system height 100mm, used for medium duty applications.

Cable Tray overview

Mita Flex offers a complete range of composite perforated cable trays, including fittings and accessories, available in two series, CT50 and CT80.

The FRP/GRP cable trays are light, yet strong and corrosion resistant. They are designed to deliver high performance, maximum load capacity with reduced weight and improved handling, allowing easy and quick installation. The cable trays are available in a variety of resin types.

A complete and flexible system

Cable Tray CT50

Cable tray with system height 50mm and widths 50 to 400 mm.

Cable Tray CT80

Cable tray with system height 80mm and widths 50 to 400 mm.

Cable Trays and fitting selection

Return Flange type profile design for added strength.

- For Electrical & Instrumentation Applications.
- Tray heights 50mm & 80mm
- Length 3000mm

CT50

Cable tray with system height 50mm and widths 50 to 400 mm.

Product	Ref No	Kg
CT50-50-3000	MCT3105PC1	2,9
CT50-100-3000	MCT3106PC1	3,7

MultiFlex support system bolt recommendations:

- When bolting Mita flex support system standard bolt size is 10 mm.
- For connections back to back use M10x25 bolt set
- For use with gusset plates use M10x30 bolt set

Cable ladder system:

→ All bolts M10
When using stainless steel accessories (splice plates, hinges, etc.) standard bolt set is M10x20 mm, when using GRP accessories standard bolt set is M10x25mm

Cable tray system:

→ All bolts M6
When using stainless steel accessories (splice plates, hinges, etc.) use M6 x 12mm bolt set, for GRP accessories use M6 x 16mm bolt set

Safety first

Tool selection

On-site cutting is easily done with the use of portable circular power saws and drilling equipment. For best results, use a diamond or carbide edged saw blade and carbide tip drill bits.

Cutting and drilling

When cutting, grinding or sanding FRP products it is important to wear suitable protective equipment. Safety glasses, dust mask rated at N94 or above is recommended, and gloves are necessary.

We also recommend wearing long-sleeved shirt or overalls when working with FRP. In some cases non-toxic dust is created if you are not in a well ventilated environment and this can cause some small irritations so make sure you wear the right gear at all times.

Effect on strength with temperature

The strength properties of reinforced plastics are reduced when the material is continually exposed to high temperatures. Loading shall be reduced based on the below table. Percentages shown are approximates.

When high temperatures are present please consult the manufacturer for application advice. Freezing temperatures do not effect the load rating of cable ladders and the cable management system as the FRP material does not be-come fragile. Special consideration is required when service temperatures are over 200° Fahrenheit/ 94° Celsius. Please contact us for expert consultation for special requirements.

Temperature	Polyester Resin % of Strength	Vinyl Ester % of Strength
75°F (24°C)	100%	100%
100°F (38°C)	90%	100%
125°F (52°C)	78%	100%
150°F (66°C)	68%	90%
175°F (79°C)	60%	90%
200°F (93°C)	52%	75%

The test values in this chart are obtained from laboratory testing

Thermal Contraction and Expansion

The table to the below compares the thermal contraction and expansion based on various temperature differentials for fiberglass, steel and aluminium cable trays. The values shown represent the length of cable tray that will produce a 16 mm (5-B*) movement between expansion connectors for the indicated temperature differential. Fiberglass has the least movement and requires least expansion joints. This simplifies the design and installation and minimizes expansion dynamic forces on the structure.

Temperature Differential	FRP Ft.(m)	Steel Ft. (m)	Aluminium Ft. (m)
25°F (14°C)	417 (126)	320 (97)	162 (49)
50°F (28°C)	208 (63)	160 (48)	81 (25)
75°F (42°C)	138 (42)	106 (48)	54 (16)
100°F (56°C)	104 (32)	80 (24)	40 (12)
125°F (69°C)	83 (25)	63 (19)	32 (10)
150°F (83°C)	69 (21)	53 (16)	26 (8)
175°F (83°C)	59 (17)	45 (13)	23 (6)

Material & Product Standards and Certifications

Fire performance

BS 476 PART 7: CLASS 1
This is a vertical flame spread test and its one of the most requested certificates.

BS 476 P6
Specifies a method of test, the result is expressed as a fire propagation index.

ASTM E84 (from UL 0568)
Tests the rate of flame spread and smoke emissions of materials.

ASTM D635
Standard test method for measuring the rate of burning and duration of burning in plastic products. / Class HB

ISO 5659-2
Specifies a method of measuring smoke production from the exposed surface of specimens of materials or composites.

ISO 4589-2
Determination of burning behavior by oxygen index

ANSI/UL94
Plastics flammability standard for horizontal and vertical class.

IEC 61537:
Non-flame propagating system component class - Contribution to fire test IEC60695-2-11 (GWT) / Spread of fire 1kW test IEC60695-11-2

ISO 6721-11
Methods for determining a value of the glass transition temperature from the dynamic mechanical properties

EN14582-2016
This standard specifies a combustion method for the determination of halogen and sulfur contents in waste materials by combustion.

IEC 60754-series
Halogen contents determination only on materials for cables.

IEC 63355:2022
"New" Standard to determine the Halogen content specially for "Cable Management Systems."

Weathering / Chemical corrosion

ASTM G154-16
Operating Fluorescent Ultraviolet (UV) Lamp Apparatus for Exposure of Nonmetallic Materials. (Color DeltaE measurement)

ISO 4892-2
Plastics- Methods of exposure to laboratory light sources - Part2- xenon-arc lamps (preferred test for "Cable Management Systems.")

ASTM D 4329 (from UL 0568)
Ultraviolet light exposure or ASTM G 155 Arc xenon light exposure (evaluating mechanical acc. to ASTM D 790)

ISO 4582
Methods to determine changes in colour and other appearance properties, and variations in mechanical or other properties

ASTM B-117
Tests a materials ability to resist the corrosive effect of salt water.

ASTM D570
Determine the rate of absorption of water by immersing the specimen in water for a specific period of time.

ASTM C581
Determining Chemical Resistance of Thermosetting Resins Used in Glass-Fiber-Reinforced Structures

Isolation / Electrical properties

Electrically non-conductive system component -resistivity values of 100 MΩ or greater.

ASTM D257-14
This test measures the volume and surface resistivity of a material.

ASTM D149 (from UL 0568)
Dielectric Strength

IEC60079-0
General requirements for construction, testing and marking of Ex Equipment and Ex Com-ponents (for Antistatic resin)

Mechanical performance

UL 0568
Nonmetallic Cable Tray Systems

Nema FG1
Standard that defines the construction and testing standards for nonmetallic cable tray systems

IEC 61537
International Standard specifies requirements and tests for cable tray systems and cable ladder systems intended for the Cable support.

IEC 61914 (Short Circuit test)
Cable cleats for electrical installations_ 9.5 Test for resistance to electromechanical force.

FRP Cable ladders, trays and accessories have been designed to withstand 25 years or more service life. Nevertheless, this cannot be achieved by product alone, Actual service of 25 years can only be achieved if cable ladders, trays and accessories are:

→ NOT subjected to any abnormal mechanical loads or mechanical impacts that would have long term effect on the performance of the product.

→ NOT subjected to abnormal corrosive atmosphere or subjected to direct contact with corrosive substance.

→ NOT subjected to any major alteration to the structure of the product or cut away areas or drill holes outside of the recommended installation guidelines.

Chemical Exposure Guide

CHEMICAL	Polyester Class 1 resin		Vinyl Ester Resin	
ENVIRONMENT	%Concentration	Max Op, Temp. F/C	% Concentration	Max Op, Temp. F/C
Acetic Acid	50	125/52	50	180/82
Aluminum Hydroxide	100	160/71	100	180/82
Ammonium Chloride	All	170/77	All	210/99
Ammonium Hydroxide	28	N/R	28	100/38

Responsible business

Wibe Group is a multinational company with operations in different parts of the world. We want to run a responsible business, by understanding and managing all effects in the value chain. We see it not only as a responsibility but also an opportunity to influence and drive sustainable development for our business and communities.

Our ambition is to take the lead in our industry. With a clear vision and long term commitment, we will get there.

In 2024, we received a Silver Sustainability Rating from EcoVadis, placing us in the top 15% of all companies in the world, and top 3% of our industry segment. Join us on our journey to create sustainable solutions for generations to come!
